PREFACE

Curriculum development is a highly organized and systematic process and involves a number of procedures. Many of these procedures include incorporating the results from international research studies and reforms made in other countries. These studies and reforms are then related to the particular subject and the position in Pakistan so that the proposed curriculum may have its roots in the socio-economics setup in which it is to be introduced. Hence, unlike a machine, it is not possible to accept any curriculum in its entirety. It has to be studied thoroughly and all aspects are to be critically examined before any component is recommended for adoption.

In exercise of the powers conferred by sub-section (1) of section 3 of the Federal Supervision of Curricula Textbooks and Maintenance of Standards of Education Act 1976, the Federal Government vide notification No. D773/76-JEA (cur.), dated December 4th 1976, appointed the University Grants Commission as the competent authority to look after the curriculum revision work beyond class XII at the bachelor level and onwards to all degrees, certificates and diplomas awarded by degree colleges, universities and other institutions of higher education.

In pursuance of the above decisions and directives, the Higher Education Commission (HEC) is continually performing curriculum revision in collaboration with universities. According to the decision of the special meeting of Vice-Chancellor's Committee, the curriculum of a subject must be reviewed after every 3 years.

A committee of experts comprising of conveners from the National Curriculum Revision of HEC in Basic, Applied Social Sciences and Engineering disciplines met in April 2007 and developed a unified template to standardize degree programs in the country to bring the national curriculum at par with international standards, and to fulfill the needs of the local industries. It also aimed to give a basic, broad based knowledge to the students to ensure the quality of education. The new BS degree shall be of 4 years duration, and will require the completion of 130-136 credit hours. **For those social sciences and basic sciences degrees, 63.50% of the curriculum will consist of discipline specific courses, and 36.50% will consist of compulsory courses and general courses offered through other departments.**

For the purpose of curriculum revision various committees are constituted at the national level, comprising of senior teachers nominated by universities, degree awarding institutions, R&D organizations and respective accreditation councils. The National Curriculum Revision Committee for Pakistan Studies held on May 16-17, 2008 at HEC Regional Centre, Karachi in continuation of its earlier meetings held on October 23-24, 2007 revised the curriculum in light of the unified template. The final draft prepared by the National Curriculum Revision Special Committee, duly approved by the competent authority, is being circulated for implementation in the concerned institutions.

4 Year Degree Program-BS Hons

Introduction / Objectives

- In order to create awareness among the students about the “Vision of Pakistan”, as given by our leaders during the freedom movement and after the emergence of Pakistan, the rationale of Pakistan’s creation is highlighted. This approach will, hopefully, bring an element of objectivity in explaining the creation of Pakistan. It will also educate the students about the nature of the state of Pakistan as envisioned by its leaders
- This approach is also useful in educating the students about the taxonomy of the state and in motivating them to develop a sense of patriotism as well as an urge for creative reconstruction.
- In view of aforementioned objectives, the course framework is sought to be issue-oriented. It seeks to cover Pakistan’s Cultural Heritage since ancient times, Muslim Political Thought over the centuries, Constitutional Development since 1947, Political Systems and their functioning, Public Policies and Reforms, Agro-Industrial Projects, Urbanization, Social Change and Transformation, Political Development and Modernization, as well as the Democratization Process through Resource Development and Management, Good Governance and Mass.

Socialization, Mobilization and Participation. This multidimensional course framework seeks to encompass wide range of issues pertaining to nation-building and state-structure in Pakistan, and provides awareness about the remedial measures for overcoming impediments inherent in our cultural and political fabric.

- The issues of Human Rights have been given equal weight, so as to provide guidelines for reshaping the Pakistani society on constructive lines, and ridding it of all sorts of evils, impediments, exploitation and Oppression, as envisioned by the Quaid-i-Azam.
- Since a state cannot survive without a body of citizens integrated and united as a coherent nation, the issues concerning Pakistan’s march towards actualizing its vision of a modern-liberal Islamic republic have been dealt with in some detail.
- This curriculum seeks to develop students’ analytical and critical capabilities and broaden their vision. This will enable them to craft careers of their own choice. This will be done through extensive seminars and research projects for the most part. The courses seek to inculcate in students qualities of hard work, futuristic outlook and initiative to excel by way of healthy competition. These courses will make the students the most sought after persons in the job market and by the employers due to their perceptible outstanding merits in the fields of teaching and research.
